TECHNICAL GUIDE - ABRASIVES

DISC SYMBOLS AND INFORMATION

DISC TYPES

- TYPE 1**
CUT OFF WHEELS & CHOP SAW WHEELS
- Available in diameters from 4 1/2" to 14"
 - Smaller diameters used with hand held tools
 - Larger diameters with stationary chop saws
 - Made using resin bonded reinforced construction for greater strength and durability
 - Used for cutting various metals
- TYPE 27**
GRINDING DISC
- Available in diameters from 4 1/2" to 9"
 - Used with angle grinders
 - Made using resin bonded reinforced construction for greater strength and durability
 - Used for deburring and blending
- TYPE 29**
FLAP DISK
- Available in 4 1/2" and 5" diameters
 - Available in 40, 60, and 80 grit
 - Used with angle grinders
 - Surface pliability prevents burning of work material
 - Used for deburring and blending

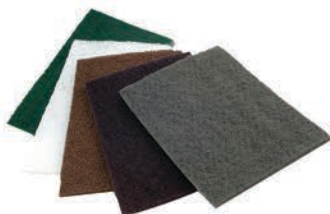

PROFERRED® 14" ABRASIVES PORTABLE HIGH-SPEED GAS SAW WHEELS

AVAILABLE IN FOUR COMPOUNDS

- C24R** Silicon Carbide grain for cutting cured concrete, brick, block, stone, and other masonry
- A24R** Aluminum Oxide grain primarily used for cutting ferrous metals such as structural steel, iron, rebar, etc.
- AC24R** A combination of Aluminum Oxide and Silicon Carbide grains for cutting ductile pipe, cast iron, coated steel, sewer and water mains
- TA24R** Specially treated Aluminum Oxide grain and hard bond for cutting thin metals such as roof decking and car body panels

6" X 9" HAND PADS

Made using flexible resin technology for increased wear and comfortable use and are non-metallic so they won't rust. Available in 5 easily identifiable grades

- Maroon - General Purpose
- Tan - Coarse for surface prep and initial work
- Green - Fine for blending and scratch removal
- Grey - Ultra fine for finishing
- White - Non-abrasive

WHEN USING ABRASIVES ALWAYS EXERCISE CAUTION. FOR PERSONAL SAFETY. BE SURE TO PROTECT YOUR EYES, EARS, AND HANDS AND WEAR THE APPROPRIATE BREATHING

Proferred.
