

VENDSAFE

Industrial Vending Solutions

Set-up

Pre-determined consumable products are staged in a Lubker Distribution provided **VEND SAFE** vending solution(s). Using scanning ID cards, you designate which items are available to which employees.

Employee Scan

Employees with authorized access use their scanning ID card to operate the vending solution and receive the product(s) selected. Audit point reporting is available down to the individual employee consumption level.

Audit Point

Audit Points are built into several stages of the vending solution. These automatic consumption reports provide the customer with as much, or as little auditing of the process as they deem necessary. Audit Points can be turned on or off at customer request and at any time.

Refill

Product delivery made by trained Lubker technicians. All **VEND SAFE** deliveries are placed directly into the vending solution, no corrugated containers left on premises following vending delivery. Packing Slip **AUDIT POINT** provided.

Invoice

Invoices can be provided for each replenishment or can be consolidated based on a pre-determined statement issue schedule. All invoices match specifically to the delivered packing slip(s) and have **AUDIT POINT** data characteristics.

Capacity

Whether a single vending solution or dozens located throughout the largest manufacturing facilities, Lubker professional technicians deliver every consumable item to its designated home. Auto replenishment requisition is available on all **VEND SAFE** vending solutions.

Supply Chain

VEND SAFE product options cover the full spectrum of consumable items from safety products, to cutting and deburring tools, to aerosols. A vast selection of generic or name brand products are available to fit your budget and production requirements.

- Automated distribution solution delivering reduced supply costs, controlled product usage and vendor managed replenishment cycle
- High quality, Coil and Locker style machines available
- Simple PIN or card swipe login
- Remotely monitored via WIFI or Verizon Network
