GRADE-5

Description	A finished hex nut made from steel with a maximum carbon content of 0.55%, a minimum manganese content of 0.30%, and a maximum sulfur content of 0.15%.
Applications/ Advantages	For use with bolts with a minimum tensile strength equal to or less than the specified proof stress of the nut.
Material	AISI 1008 - 1026 or equivalent steel
Core Hardness	Rockwell C32 maximum
Proof Load	<i>1/4 through 1 in. Coarse thread:</i> 120,000 psi.; <i>Fine thread:</i> 109,000 psi. <i>1-1/8 through 1-1/2 in. Coarse thread:</i> 105,000 psi.; <i>Fine thread:</i> 94,000 psi.
Plating	See Appendix-A for plating information.

GRADE-8

Description	A finished hex nut made from steel with a maximum carbon content of 0.55%, a minimum manganese content of 0.30% and a maximum sulfur content of 0.05%. The purchaser and producer of the nuts may agree to allow a sulfur content of 0.33% maximum provided that the manganese content is at least 1.35%.
Applications/ Advantages	For use with bolts with a minimum tensile strength equal to or less than 150,000 psi..
Material	AISI 1021 - 1045 or equivalent steel
Core Hardness	<i>1/4 through 5/8 in.:</i> Rockwell C24 - C32 <i>3/4 through 1 in.:</i> Rockwell C26 - C34 <i>Over 1 in. through 1-1/2 in.:</i> Rockwell C26 - C36
Proof Load	<i>1/4 through 1-1/2 in.:</i> 150,000 psi.
Plating	See Appendix-A for plating information.

*Product standards require all grade-marked nuts 1/4" diameter and larger to have a raised or depressed insignia identifying its manufacturer. "X" represents one location such an insignia may appear.
